## *DEEPER INNER-STANDING OF THE PROJECT MISSION AND VISION*

“Remember Future, Her Queendom Come” is an immersive experience aiming to bring the collective consciousness forward to its authentic self: in perfect symbiosis and harmony with the natural environment surrounding us all. A series of collages embodying this very theme brings into the collective the remembrance of this innate love that mankind has for Nature and its divine intelligence.

Positive development and growth is still possible, as we become more responsible and sovereign as a community, adopting a wiser and more sustainable use of our resources and technologies.

As the “guardians” of planet Earth, the ultimate aim is to leave behind a living home for the future generations instead of a graveyard, so that they thrive in turn.

# 3 WHY?

This project is a **catalyst** so to speak, that **accelerates the actualisation of our awakened humanity.**

The goal is to inspire change and transformation, not to impose it.

To have it be a **sovereign choice**. A decision birthed from comprehension and not knowledge alone.

Allowing the viewer the privilege of experiencing first hand the subtle yet potent powers of nature, **the fun and healing effects of a naturally rich and bibliophilic environment**, rather than lecturing them about it.

No shift in legislative will turn the table until there is first a pivotal shift in consciousness.

With the aim of bringing the participant into a world beyond time, where nature is experienced as both a playground and a fertile soil for the imaginary. A safe haven where to escape from the hectic modern city life and rat race for a while.

**A moment to be still.**

To reconnect with yourself, nature and art in an anciently new way, in a symbiotic way once again.

To inspire in the viewer a humanity living in coherence with its environment, Mother Nature. And tuned to the mysteries of the cosmic tapestry that we are all threads of.

# 3 WHY?

"Wisdom is  
the daughter of experience"

- Leonardo Davinci

# MODELS AND SKETCHES

A watercolor illustration featuring a vibrant chameleon with green, pink, and yellow patterns perched on a dark branch. The scene is surrounded by various types of green foliage, including large monstera leaves, small oval leaves, and fern-like fronds. In the center, a golden mandala with intricate geometric patterns is visible behind the text.

See you on the  
astral plane!
