MEDICAL REPORT

26.05.2021

Ref: Mrs. BOODOO Noëlleta

D.O.B: 30.10.77

10 Rue Farquhar,  
Curepipe Road.

Dear colleague,

Mrs. Boodoo Noëlleta, born on 30.10.77, G2P2, came to see me in my office on the 14<sup>th</sup> of April 2021 because of yellow discharge, itchiness, bleeding, back pain, headache and post-coital bleeding.

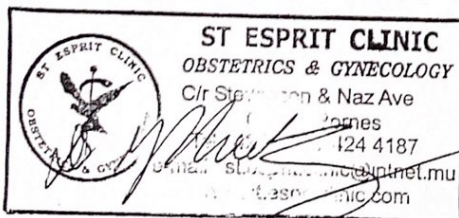

Speculum examination showed a 5cm x 2.5cm irregular cervix polyp and yellowish discharge. On contact it started to bleed heavily .

Swab, pap smear and haemorrhagic tissues pieces were sent for examination. Attached copies of results.

A removal of the polypoid mass was performed. A Mullerian Adenosarcoma was diagnosed. The pathological report is attached.

Since a Mullerian Adenosarcoma cannot be treated in Mauritius, I am sending you Mrs. Boodoo for further investigations and treatment.

Thank you.

Kind regards

Dr B. Ng Kuet Leong
